## Energy Reduction Checklist

Turn off lights in unoccupied rooms (appoint a student committee "light police")	
Recycle or reuse paper, plastic, glass and cans	
Set computer monitors to turn off instead of running screen savers	
Make sure exterior doors and windows are closed	
Use stairs instead of elevator	
Fix leaky faucets	
Install faucet aerators (reduce water pressure)	
Make sure supply and return vents are not covered or blocked	
Lower water heater setting to 120 degrees when possible	
Use CFL or LED light bulbs	
Use natural light from windows to light room whenever possible	
Use dimmers and/or motion sensing switches in lights	
Make sure HVAC has clean filters and is operating properly	
Turn off copier at night	
Print double sided whenever possible	
Install automatic timer where possible	
Implement a 2 day/week laminating period and keep machine turned off on other days
