Flower Making Instructions:

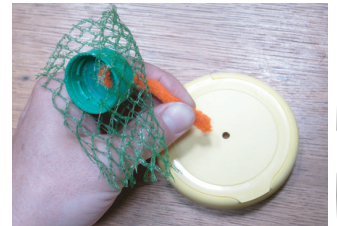

1. First, select the 5 components to make flower;
Fuzzy stick, bottle cap, flower petal, lid and stem.
*Remind children that opposite colors on a color wheel create contrast and vivid flowers.

2. Fold fuzzy stick in half and thread through bottle cap "like a button". Next add *optional* embellishment such as mesh or silk flower.

3. Pinch fuzzy stick ends together and "thread" through lid. *Make sure lid will be large enough to expand flower petals.

4. "Thread" fuzzy stick ends through flower petal.
*Make sure desired color is facing up.

5. If flower petals fold backwards, add one more lid to help expand petals.

6. Flip over. Place flower stem (or stick) between fuzzy sticks and twist tight.

Place flower in garden.
No water or sun necessary.
